

The CKD Biomarkers Consortium Pilot and Feasibility program Awardees

June 2015

Dynamic prediction of clinical outcomes using biomarkers and other prognostic information in longitudinal cohort studies of CKD

Liang Li, PhD
Anderson Cancer Center

Serum Amyloid A as a New Biomarker of Diabetic Kidney Disease

Katherine R Tuttle, MD
Providence Health Care

June 2016

MicroRNAs in progressive renal disease - a pilot study in CRIC (MIRROR-TRIC)

Christos Argyropoulos, MD, MS, PhD, FASN
University of New Mexico

Glomerular biomarkers of progression in IgA nephropathy

John Arthur, MD, PhD
University of Arkansas for Medical Sciences

Biomarkers in Uromodulin Kidney Disease

Anthony Bleyer, MD
Wake Forest Baptist Health

A comparison of soluble klotho assays and association with kidney function

David A. Drew, MD, MS
Tufts Medical Center

Metabolomic Biomarkers for Neurocognitive Dysfunction in Children and Young Adults with CKD

Erum A. Hartung, MD, MTR
The Children's Hospital of Philadelphia

Clustering Chronic Kidney Disease Progression Using Longitudinal Measurements of Multiple Biomarkers

Yuedong Wang, PhD
University of California, Santa Barbara

Statistical Methods for Predicting Time-to-Event Outcomes with Time-Varying and High-Dimensional Biomarkers in the Nephrotic Syndrome Study Network (NEPTUNE)

Jarcy Zee, PhD
Arbor Research Collaborative for Health

Discovery of tissue biomarkers of CKD progression in RCC patients

Robert H. Weiss, MD
University of California, Davis

The CKD Biomarkers Consortium Pilot and Feasibility program Awardees

June 2017

Statistical Methods for Genomics of CKD

Andrea Foulkes, Sc.D.
Mount Holyoke College

What are the effects of protein carbamylation in patients with chronic kidney disease (CKD) not yet on dialysis?

Sahir Kalim, MD, MMSc
Massachusetts General Hospital/ Harvard Medical School

Urine-derived Stem Cells as a Novel Biomarker for Diabetic Nephropathy

Yuanyuan Zhang, MD, PhD
Wake Forest University Health Sciences
